GERMOCARE LINE - TECHNICAL DATASHEET

NEO STERIXIDINA SOAP

NEO STERIXIDINA SOAP is a disinfectant soap with bactericidal, yeasticidal, and virucidal (limited-spectrum) action, based on 4% chlorhexidine digluconate in a ready-to-use liquid soapy solution. Its active ingredient, intended for the antiseptics of intact skin in general and hands in particular, eliminates microorganisms while minimizing bacterial flora. Special emollient and superfatting substances prevent skin cracking and maintain the natural lipid layer.

NEO STERIXIDINA SOAP is a skin antiseptic registered with the Ministry of Health that can be used to disinfect surgeons' hands before procedures and the hands of medical and nursing staff to reduce the risk of cross-infection.

INSTRUCTIONS FOR USE

HANDS:

Use 5 ml of NEO STERIXIDINA SOAP on wet hands and keep in contact for 1 minute. For hand disinfection before surgical operations repeat the washing for 2 minutes. It is recommended to use the soap with a brush for a deeper nail cleaning. Rinse your hands with water after use.

SKIN:

Moisten face and body and wash with NEO STERIXIDINA SOAP (approx. 25 ml) starting from the face. Rinse thoroughly with water and repeat the treatment. Do not use on broken skin, mucous membranes, or on patient skin prior to a pre-operative medical procedure.

PACKAGING

Internal Code:	Primary packaging:	Secondary packaging:
A870	500 ml bottle	Box containing 12 bottles
A871	1000 ml bottle	Box containing 12 bottles
A873	3000 ml canister	Box containing 6 canisters

All primary packaging is according to the specifications provided by the Pharmacopoeia. The materials do not contain allergens and are perfectly compatible with all components of the formulation.
